Forecast for Wednesday 27 Dec 2023

Weather: Widespread heavy snow will develop by mid-morning this lasting until mid-afternoon. Snow will turn to rain as it clears away, with some showers of rain, sleet and snow following on behind for the late afternoon and evening. Very treacherous conditions expected widely with gusty winds across all upland areas.

Chance of cloud-free hill tops above 800m: Little chance for much of the day. Low cloud will clear from the southwest in the evening.

Low cloud and visibility: Whiteout conditions expected in snow for much of the day with extensive cloud down to 500 metres. Markedly improving as cloud clears in the evening but some mistiness still likely.

Met Office Aberdeen Meteorologist's View

A very treacherous day across all ranges with heavy, drifting snow and storm force winds. Speeds may reach 120 mph or so across the Cairngorm Plateau for a time. A thaw of lying snow is likely for a time in the afternoon as freezing levels start to rise, so burns and paths at lower levels may see some flooding. Freezing levels may rise to 1200 to 1500 metres in the afternoon before dropping back to 800 metres in the evening.

Forecast for Thursday 28 Dec 2023

Weather: Mostly cloudy with some showers or longer spells of rain, with snow above 700 metres or so. Turning drier from the north in the evening. Cold summit winds.

Maximum wind: Southerly 25 mph with gusts to 35 mph

Chance of cloud-free hill tops above 800m: 40%, best chance in the morning

Low cloud and visibility: Very good outside of cloud and precipitation. Areas of cloud between 600 and 900 metres, this most extensive in the afternoon.

Temperature: **Glens:** Minus 1 rising to 4 Celsius
At 800m: Plus 1 Celsius
Freezing level: 900 metres
